Lecture 14 Exercise: Movie Shop—Acceptance Testing

The following statements are extracted from the movie sales and rental shop problem statement.

- The system must be able to handle both physical and digital movies.

- It must be able to record which movies are sold and rented and by whom.

- Members … can buy and rent digital movies via the Web.

- A sales clerk should be able to sell and rent physical movies and process the return of rented physical movies.

Restate these requirements in a testable way and group them by functionality.

Buying Movie
• Demonstrate that the system records information who bought a movie
• Demonstrate that members can buy a movie
• Demonstrate that a salesclerk can sell a movie
Renting Movie
• Demonstrate that the system records information who rented a movie
• Demonstrate that members can rent a movie
• Demonstrate that a salesclerk can rent a movie
• Demonstrate hat a salesclerk can process a return of a physical movie
